Paris - Rue de la Paix N° 22.

Hotel de Bourbon. - Rock.

Mercredi Janvier 1. -

Th. 34. Thaws. & as dirty & disagreeable a day  
as could be picked out. -

The weather for some weeks has been  
very cold, & a hard frost without snow, but  
lately very fine. - Some most heavy fogs have  
occurred & a few short but very heavy gales  
of wind, from which great damage at sea,  
has been sustained. - Otherwise the weather  
for the season has been beautiful. -

A congress has been held at Verona,  
at which the Duke of Wellington attended on the  
part of England, & it is now a question whether  
Spain will be invaded by France in conse-  
quence of the Antimonarchical principles displayed  
by the Cortes & those now at the head of affairs  
in Spain - The state of affairs between the  
Greeks & the Turks remain the same - The

2 The Emancipation of the different Colonies in South America is nearly completed, - As to poor Old England - things remain much in the same state - The Agriculturists are all ruined and unless the Government seriously set their shoulders to the wheels of retrenchment the whole country must be in the same state. W. Canning has succeeded Lord Castlereagh as Secretary of State, & seems to have the confidence of the people - but as nothing can be certainly known till the meeting of Parliament in Feb. that event is anxiously looked for. -

Amongst the domestic events of the year past may be reckoned the death of my worthy friend Caesar Colclough Esq. late Chief Justice in Prince Edwards Island & Newfoundland and his wife & children's subsequent departure for Waterford in Ireland. -

Also the death of Jeremiah Kerstman Esq of Canewdon  
W<sup>r</sup> Thomas Miller, Surgeon of Great Wakering  
Rev<sup>r</sup> Miles Moor. - Vicar of Sutton  
L<sup>r</sup> W<sup>r</sup> Swaine Sen<sup>r</sup> of Rockford -  
Mr. Lacell of Prittlewell Hamlet. -  
Cap<sup>r</sup> Brown. R. Martinus - Son of the Brunonian.

This is a great Visiting day amongst the French, but the weather is very unfavourable to it.  
It snows & the streets are beastly dirty - we intended taking a stroll to see what was going on but the state of the weather rendered it impossible -

- Walked & visited Mr. Lettsom & Mrs. Hobbs in Rue Montabor - and remained at home the remainder of the day. -

### Combat des Animaux.

This exhibition is at the Barrier de Combat.

I had been th<sup>e</sup> 5 O'clock was th<sup>e</sup> hour, & got there before 4. - After taking a turn through the place to look at the animals - I walked to the Canal which is near here - where their ridiculous water parties are held off - I returned before 6 - but the fight did not begin till near half past - Paid 25 sous for the first seats which are a sort of Boxes - the others, undivided are 15, & the ground only 12 sous -

The place is square, & the seats are all under cover about 10 feet from the ground -

Many dog fight first took place - then a (tame) Wild Boar was turned out, & hunted, but he seemed quite up to the business & bolted for every den he thought he could get into. - A small Deer next ran pretty - & after him a large Stag who kept himself at bay & made a great noise with his fore feet - he was soon & then forced out, but no good dogs were let at him. - A Donkey afforded good sport, he was a famous kicker & seemed quite aware of what he was to experience - a good Dog was at last let in upon him, who had him by the Ear in an instant. - A large Black Bear was next haggled out from his den, to the ring in the center of the ground - & afforded good

sport - he kept his head under his fore leg, & 113  
fought with his paws. - his tusks are filed.  
A Wolf was next brought from his den &  
fastened in the same way by a long rope to  
the centre ring. - he was crippled in his hind  
legs - he kept running round snapping as  
he went along - when he got hold of a dog, he  
bit severely, but he never attempted to retain  
his hold. - Some good dogs were at last let  
in, who would have killed him had they  
not been taken off. - A Bull baiting suc-  
ceeded, where the thorough bred dog com-  
pletely shews himself - nothing could prevent  
their seizing whatever they run at, & three  
of them when let in fixed themselves on the  
animal's throat like leeches. - till they were  
forced off. --

A young bear is made to climb a mast,  
in the midst of fireworks - & a Bull Dog  
is brought in blindfold & made to seize  
some untwisted rope attached to the centre of  
an iron hoop, by which he is drawn up  
twenty feet from the ground - twice and let  
go through, the hoop is covered with firework which  
go off all about him - he however retains  
his hold, shaking the tow he has hold of as

114. violently as he can while suspended &  
suffers himself to be lowered to the ground &  
again drawn up without quitting his hold -  
No exhibition so well shews the difference  
between the Brongrel, the half bred, & the  
thorough bred animal as this does. -

It was not over till after Nine o'clock -

Returned to Mr. Reed's when Eliza was, & then  
home. -

before the Balloon ascended, on the arrival of  
Mons. - the Duke of Berry & our Duke of  
Cumberland at the Balcony of the Ecole Militaire.  
- A ring of lights was attached to the Balloon,  
& the blue light in front of the Ecole Militaire  
shone way down the Champ de Mars on each  
side reflected so brilliant & clear a light, that  
every thing of the ascent was most distinctly  
seen - As usual before being permitted to  
mount, the Balloon was led to the Balcony  
occupied by the Royal personages & then  
mounted very majestically - H. . . . was  
the Aeronaut. -

Some good fire works succeeded, which were  
placed on the new road where the palace of the  
King of Rome was began - immediately succeed-  
& the Avenue on that left or W. side of the

à Paris. — Rue de la Paix N° 22.

a wet disagreeable day - wind very high..

The weather has been unusually wet throughout the winter, not so much heavy rains as frequent light showers, I do not think there has been one day without rain through the Month of December, & the fogs have been as frequent & as dense in Paris as ever were seen in England. — Many heavy Gales of Wind.

The French Campaign in Spain has completely succeeded the purpose intended by it & great moderation has been displayed by the Duc d'Angouleme as commander in Chief of the French Army. —

The South American independence is sealed, & will bid defiance to any efforts of the Mother countries to regain their influence.

The Agricultural interest is not quite so bad, & feels the beneficial effect of a reduction of a moiety of Oppressed Taxes.

From a mistaken zeal of some Missionaries in the West Indies, a considerable fermentation has taken place amongst the Negroes, who have been led to hope for an immediate Emancipation. --

Rode to Dr. Swedaine's - very wet - Mr. Phelps called - Mr. Berthling - Charge d'Affaires de S.A.R. le G<sup>r</sup>. a boy who has been many months under my care  
and successfully treated after having been  
under the care of every man of eminence who  
came in his way without obtaining the least  
relief. - the following notice of this case ap-  
peared in Gallignani's Messenger of the 21 of  
this Month.

AN EXTRAORDINARY CASE.—A very singular case of Constipation of the bowels has lately come under the care of Dr. Asplin, of No. 22, Rue de la Paix. The subject of it, a boy now about thirteen years of age, has been frequently two and three months, and at one period the unprecedented time of six months, without an evacuation. After having been treated in vain by some of the most eminent in the profession, the case was considered hopeless; but, having undergone an operation, the boy is now doing well, and his appearance so much improved, that there is little doubt of his perfect recovery, after a continued suffering from his cradle. We have seen the subject of this singular case, and think it only justice due to the skill and attention of Dr. Asplin to make it public.

The King

Saw the King go out to day by the Pont Royal in  
my way to Swedians - He seems to hang  
his head a little to the right side, but there  
was a life & brightness in his eyes, which looks  
like any thing but a dying man. - which the  
English papers & reports here are continually making  
him - If I am right in my conjecture, he  
will live longer than those about him are aware  
of - & I hope he will - No King could be  
entirely popular here - & no one could do more for  
his Country than his present Majesty has already done.

Stone in the Bladder - Seven small ones & some  
still smaller - The Bladder universally disengaged  
inflamed & thickened & externally united to every  
thing it touched. - It was largely distended  
with Urine & the prostate much enlarged -

This has been the cause of his indisposition  
for the last two years - & which has killed  
him - he never dreamed of the existence of Stone  
and attributed the difficulty he experienced in  
making water & latterly the extreme pain, to an  
irritability of the Bladder to which old age is  
extremely subject. -

He had no other complaint. -

not a large party there & I went to see the  
ceremony of crowning the Rosière at the  
church. Tickets for admission were necessary  
& the crowd was very great - The church was as  
full as it could hold - The Bishop of Toulouse

presided & the wife of Genl. Dupont crowned the  
Rosiere - There were three candidates, who was to  
the happy one was decided by Votes, which was  
declared by one of the Priests. -

### the Rosiere

Is a sort of endowment to many parishes of  
a certain sum per annum usually about Three  
Hundred francs. to be given to the most virtuous  
best behaved girl in the commune or Parish  
who having this portion usually gets married. -

The Mayor & Authorities attend & a grand proce-  
cession takes place afterwards - all which is very  
pretty - The Mayor gives the young people of  
the Village a ball in the Evening & dances with  
the Rosiere - he also to day entertains a large  
party to dinner -

We dined with a large party at Sir John  
Byrleys & in the Evening went to the Mayors  
ball which was pretty enough - & they all  
seemed very happy - The Peasantry dined  
in the Garden the Guests in the house for both  
of which the same music served - Every girl  
of the Village was dressed in white & had a pink  
ribbon round the shoulder & waist - The  
crown consisted of Red Roses was put on the  
head of the Rosier by Madame Dupont. -

# France.

PARIS, SEPTEMBER 17, 1824.

LOUIS XVIII. is no more! He has gradually sunk at the age of nearly 69 years, under a long and painful illness, which he supported with the magnanimity of a sage, the resignation of a Christian, and the firmness worthy of a King. His life belongs henceforward to posterity: truth begins, for Princes, when they have ceased to exist.

To judge correctly of the reign of this Monarch, whom France deplores, we must consider the circumstances under which it was accomplished. We must call to mind France in 1814. It had just emerged from a great Revolution, in which it had by turns been subjugated and dazzled by exaggerated ideas of independence, and the splendour of a military despotism; the most astonishing reverses had followed the most astonishing victories; and France, invaded by the Allied Powers, and confounded by her unexpected position, no longer knew what to wish, or what to hope.

It was in the midst of all these difficulties that Louis XVIII. commenced his reign. It was necessary to satisfy the cravings of a generation, eager for novelty, without adopting its ideas. It was necessary to preserve the ancient Monarchy, and yet to accommodate it to new wants and circumstances. It was necessary, in short, to maintain the results of the Revolution, without recognizing the Revolution itself; and to confirm all the existences it had created, while reviving ancient institutions forgotten or proscribed.

It was after meditating on all the duties of this difficult situation, that Louis XVIII. gave to his people the Constitutional Charter; that bond of alliance between the past and the present, which rejuvenated the old institutions of the country, and introduced into France that system of Government which constitutes the strength and pride of Great Britain.

The Crown, in thus modifying itself, concedes to the subject all the liberties, all the guarantees, compatible with a Monarchical Government: an Elective Chamber, open to all capacities; a Chamber of Peers, composed of all those names illustrious by ancient descent, or ennobled by recent achievement; freedom of worship, with a national Religion; the liberty of the press, with restrictions suitable to the French character, and to the manners of a lively, spiritual, and satirical people; individual liberty, with no other limits but those of law, or of judicial process. Such were the great and loyal concessions made to the nation by the Throne.

Imperious and difficult circumstances, it is true, did not always permit the entire execution of all these Royal concessions; but never, in any country of Europe, England only excepted, did the citizen enjoy so much of liberty. Under the reign of Louis XVIII. also, public credit, which lives in public liberty, was augmented and consolidated to a surprising degree. Who does not remember the time when 700 millions were imposed on invaded France? Who does not recollect that even in the days of Bonaparte's greatest glory, the Funds were ever greatly depressed, and that they have risen above par under Louis XVIII.? Such was the confidence in the personal integrity and good faith of the Monarch, that never, even in the most critical epochs, did the Stockholder apprehend the injury of his fortune from political shocks or national bankruptcy.

If we turn our attention to the internal prosperity of France, we behold wealth flowing in ample streams. Agriculture has effected miracles; Manufactures, though still below those of England, are making rapid advances to perfection; canals have been opened in all directions; and maritime commerce is in full activity. It must be said, to the honour of the Prince, that poverty is becoming rare in France.

Let us pause also to notice the Army, formed, as if by enchantment, amid the wrecks of the military institutions of the empire, and in the midst of discouragements. Nothing could have been more difficult, and yet nothing has been more perfectly executed. Self-devotion, *esprit de corps*, bravery, every thing that is requisite, is to be found in the new army.

Thus Louis XVIII. may be said to have founded anew the monarchy of the Capets;—to have commenced for France, tired of glory and excesses, an era of liberty and of reason.

Amidst the multifarious labours of so vast and active an administration, and the splendours of so brilliant a throne, Louis still preserved the amiable virtues of domestic life, and the habits and feelings of a father of a family. The King of France, in his palace, was still the Exile of Hartwell, and the pious Prince who

comforted the French soldiers in the depths of Russia; religious without bigotry; kind without weakness; he loved above all things, in his private conversation, to talk of his people—he loved to see them, and to hear them.

It is from a full conviction of these great and good qualities in their deceased Sovereign, that the people now require his love by tears and lamentations. Political opinions and political dissensions are forgotten—no one speaks—no one thinks, but of the King; and all parties unite in one general expression of regret.

There is, however, one great source of consolation to France. It is in the certainty that the new reign will produce no change in the administration of affairs; and that the political principles of the King who dies will survive in the monarch who succeeds. Never has that ancient maxim “*The King never dies in France*” been more completely exemplified than in the present succession to the crown. All is calm—all is tranquil around us; the public faults have experienced no depression, so established among the nation are the principles of monarchy and of hereditary right.

Great hopes are entertained of CHARLES X. His chivalrous loyalty—his character so truly amiable and so entirely French, are well known. What wish does he, what wish could he indulge, that is not for the interests and the prosperity of France?

## DEATH OF THE KING.

The King died this morning at four o'clock precisely. September 16, 1824.

*The Chief Gentleman of the King's Chamber,*

*The Count de DAMAS.*

The Chief Gentleman of the King's Chamber having announced at the Tuilleries the death of his Majesty, the King's Civil and Military household proceeded forthwith to the Pavilion Marsan to receive the commands of his Majesty Charles X.

The King's Body Guards, and the ordinary foot guards of the King's body relieved the posts of MONSIEUR's Body Guards.

The King, accompanied by the Dauphin, his Royal Consort, and the Duchess of Berry, left Paris for St. Cloud at six o'clock.

(Signed as above.)

At a quarter past four o'clock, the Chancellor of France, and the Ministers Secretaries of State, were admitted into the King's presence to receive his commands.

The King caused letters to be dispatched to the Archbishops and Bishops, and the Courts of the kingdom.

This day, the 17th inst. the King will receive at St. Cloud the homage of the Royal Family and the Princes of the blood.

To-day also the public bodies will be convoked to offer to his Majesty their homage.

The Peers of France, and the Deputies of the Departments will be admitted individually.

On Wednesday, at five o'clock, after the violent attack which the King experienced in the morning, all the persons assembled at the Palace of the Tuilleries went to the Chapel, where the prayers of Forty Hours had been said for three days. At nine o'clock, the access of fever was greater than ever, and the respiration became alarming. At midnight the King became more tranquil, and the persons assembled at the Palace withdrew, to return some hours afterwards. A physician, (M. Dupuytren) announced in the evening that the fatal period might be between three o'clock and five. At two o'clock, the King gave his confessor to understand that he heard his exhortations. The beating of the pulse became nearly insensible. Nothing painful or convulsive indicated the approach of death, but the King as it were, “sighed his soul away.” The Royal Family, the Grand Almoner, and the Great Officers of the Crown were round the bed of death, when at four o'clock one of the physicians having drawn one of his Majesty's hands out of the bed said: The King is dead!

At these words King Charles X. kneeled at the side of his brother's bed, and kissed his hand with deep emotion. The Duchess of Angouleme bathed in tears, threw herself into the arms of the King her father, and kissed the hand of the King her uncle. When the King rose from his knees, the Dauphin and the Duchess of Berry kneeled before the bed of the late King, and in tears embraced the King their father.

The Duke of Orleans embraced the King. It would be vain to attempt to depict this sublime and melancholy scene. Amidst the tears and sobs of his Majesty, the words *Providence and France* were several times repeated.

When the King withdrew to proceed to his apartments, the words *The King is dead, Gentlemen, Long live the King*, were distinctly heard.

It having been officially announced that the apartments of the King at the Palace of the Tuilleries would be open yesterday from ten o'clock in the morning till six in the evening, the public pressed in crowds to the doors of the Palace for admission to the remains of departed Majesty. The King's hands are quite colourless, and grasp a crucifix. The body at nine o'clock was placed upon a temporary bed remarkably plain, surmounted by a green canopy. The bed of State

upon which it will be placed is preparing. The King's head is covered with a cap trimmed with lace; a band passes under the chin, and is tied on the top of the head. The countenance, although it may be distinctly recognised, is remarkably thin, and bears marks of the pain which the King endured for some days.

At nine o'clock couriers were dispatched from the Foreign Office to announce to all the Ambassadors and Ministers at Foreign Courts the death of Louis XVIII. The succession of King Charles X. will be subsequently notified.

The Count de Damas, Chief Gentleman of the King's Chambers, and all the persons in his department, followed King Charles X. to St. Cloud.

The Grand Chamberlain surrendered the Royal Body into the hands of the Chancellor of France, who performed the functions of officer of the Civil State, and the grand *Referendaire*, assisted by M. Cauchi *Archiviste* of the Chamber of Peers.

When the Ministers waited upon King Charles X. to receive his commands, his Majesty told them to continue to serve him with the same fidelity as they had served the King his brother. "My first moments" added the King "were given to my sorrow; henceforth I am wholly surrendered to my duties."

After the arrival of his Majesty at St. Cloud, he was waited upon by the Cabinet Ministers. The Neapolitan Ambassador had an audience, and the Duke and Duchess of Orleans, the Duke of Bourbon, and the Infant Don Miguel, visited the King and Royal Family.

At six o'clock yesterday morning, the Lieutenant-General, Commander of the 1st military division, repaired to the different barracks on the left bank of the Seine, and the Count de Wall, commander of the Place of Paris went to those on the right bank. At their approach the troops took arms.

"Soldiers," said the Commander of the 1st military division, "His Majesty Louis XVIII. has just closed his glorious life. The King has commanded public prayers to be offered up. It is the intention of His Majesty Charles X. that the troops should attend them. Your colours, drums, and trumpets will there be covered with funeral crape. The officers will wear crape on their arms and swords until further orders. Soldiers! after having given tears to him whom God has just called to himself, let us give our hearts and arms, and blood, if it be necessary, to his Majesty Charles X." These words were followed with unanimous shouts of "Long live the King! Long live Charles X.!"

The *Courier* of Monday evening, after alluding to the approaching dissolution of Louis XVIII., adds as follows:—"Whenever that event happens, he will be deeply regretted by all who, politically, considered him as steering a steady and conciliatory course, amid great conflicting difficulties; and who personally esteemed his amiable private character.—We understand it is not likely that the demise of the Crown will occasion any change in the Councils, or in the policy of France. Her present Ministers are said to possess the confidence of the Heir to the Throne, who is also popular with the army as well as with the people. It is consolatory to reflect, that in so short a period as has elapsed since the revolutionary and tyrannical days of France, there is every reasonable hope afforded to Europe that a continuance of peace, good order, and quiet government, will be the only result of the demise of the French Crown. Much of this great good may certainly be ascribed to the wise, lenient, and conciliatory government of his Majesty Louis XVIII."

During his late Majesty's indisposition the Royal Court of Paris, after the example of the ancient Sovereign Courts, sent its Chief Registrar, preceded by an Usher, to the Palace of the Tuilleries, several times a day, to enquire after the King's health, and then communicate it to the Court. The Registrar wore a red gown, and was introduced to the Chief Gentleman of the Chamber.

A Council of Ministers was held yesterday at the house of the Comte de Villèle.

The Public will be admitted from 10 o'clock this morning, to pass through the apartment of the late King.

The Court will go into mourning this day for seven months. The mourning will be divided into three periods:—the first for three months; the second for two months, and the third for two months.

The affair relative to the charge of fraud against M. Rommage, should have come on for further hearing yesterday, but in consequence of the King's death it was postponed.

Mr. John Freeborn, of Rome, has been nominated Vice Consul of his Britannic Majesty, and not Consul, as announced in the *MESSANGER* some time ago.

Extract of a private letter of the 22d ult. from Odessa:—"According to the last letters from Constantinople, the ministerial crisis which is preparing appears to be much more serious than was at first supposed. Open war is declared against Ghalib Pacha the Grand Vizir, seconded by the Reis Effendi. Said Effendi is their partisan on the one hand. The other is the party of the Janissaries, at the head of whom is their Aga, Hassem Pacha, who at the same time is commander of the fortresses of the Bosphorus. The latter is powerfully seconded by the former Director of the Mint, who for some time was exiled, but has just been recalled, and by the Selictar Aga (sword-bearer of the Sultan) who was also disgraced, but is

now in higher favour than ever. These two functionaries have embraced the Janissary party with ardour, and we are assured that the Sultan has given to the Grand Vizir some signs of his dissatisfaction. The interior state of the capital has been far from tranquil since the arrival of intelligence relative to the recapture of Ipsara. In several quarters the Greeks have been pillaged and murdered. The Grand Seignior has given orders for 20,000 men of the Asiatic troops, encamped along the coasts of Asia Minor, to march immediately towards the Gulf of Smyrna, with the intention, undoubtedly, of putting down the insurrection which has broken out among the Asiatic soldiery at Scala Nuova, although the pretext alleged for this departure is the necessity of reinforcing the transport troops of the Capitan Pacha. Since the arrival of the Egyptian expedition at Rhodes it is believed that Mehemet Ali will turn to his private advantage the plan which he suggested to the Divan, of transporting Christians into Egypt and Egyptians into the Morea, and thus founding an African colony in Europe. Whilst writing the above, letters from Constantinople as late as August 7th have come to hand. They state that the Ipsariots themselves completed the destruction of their island, and transformed it into an uninhabitable desert. All the cannon of that place they took away or destroyed. The islanders afterwards gave up their wives and children into the hands of the inhabitants of Hydra and Spezzia, recommending them in the most affecting manner to their protection; and every one went on board their fire ships with the firm resolution to set fire to the Ottoman fleet or perish in the attempt. The valiant Canaris is at their head, and perhaps at this moment the blow is struck. The impatience with which intelligence from sea is looked for is extreme."

Extract of a private letter of the 13th inst. from Boulogne:—"The passage between France and England has lately been very active. In consequence of the scarcity of political intelligence the number of couriers for some time past had been very inconsiderable. Within a few days they have been numerous, in consequence, without doubt, of the King's indisposition. Among the English of distinction at Boulogne at this moment are, 2 Admirals, 10 Generals, 18 Colonels, 18 Lords or Ladies, 10 Knights, 12 Naval Captains and 6 Physicians."

To-morrow the King will review the Royal Guards.

Most of the shops of the capital, particularly in the most commercial streets, as the rue Vivienne, the rue de la Paix, etc. were closed spontaneously.

In the parish of Viré, department of the Sarthe, a woman was recently delivered of four children at a birth, who also gave birth to four children in 1803.

A lamentable occurrence took place a few days ago at Lyons:—Some journeymen shoemakers entered the house of a master shoemaker, and desired him to discharge one of his workmen. Upon meeting a refusal, a quarrel ensued, when the master and his man seized their knives, and wounded two of the other party. One has since died of his wounds, and the other is in a dangerous state. The rest of the aggressors, six in number, as well as the master shoemaker and his workman, are in custody.

On Tuesday the Court of Assizes sentenced a young man to five years' imprisonment and to stand in the pillory, upon conviction of having inflicted wounds upon one of his fellow-workmen, by which he was rendered incapable of work for more than 20 days.

At Rome, the Marquis Joseph d'Ovigo has recently invented a fire-engine of a particular construction, which promises to be very effective in case of fire. The water is sent up in a mass and falling in jets upon the flames, covers them with such a volume that the burning mass is covered with a kind of deluge.

Mrs. Beins called with her Sisters - Miss Laddens - One of whom goes to England on Wednesday Mr. & Miss Foster called - Elijah called on Mr. Gardiner & Mr.<sup>rs</sup>. Goodchild. - & Mr. Frank -

In the midst of the Cenotaph upon a socle, stood the sarcophagus entirely of gold, covered with cloth of gold, with insignia and a rich pall, and supported by four angels bearing palm branches. The ceiling of the Cenotaph, divided into compartments, presented in the centre a cross enriched with stars, and surrounded by initials, angels' heads, and emblems of royalty. The catafalque was illuminated by 24 candelabras in gold and lapis lazuli, bearing sepulchral lamps, placed on the sides; 12 sepulchral lamps suspended from the soffits, and an immense number of candles in rich candlesticks of silver gilt, placed upon the steps. Above the catafalque a canopy, ornamented with the Royal Crown, was suspended from the vault. It was adorned with four ample curtains of black velvet, sprinkled with fleurs des lis and tears, enriched with cords, tassels and fringe of silver, and bordered with a band of ermine. In front of the catafalque towards the sanctuary, the Royal mantle with the King's Orders were displayed upon a table; and upon a pedestal covered with black velvet were placed, the Royal helm, the coat of mail, the shield, the gauntlets, and the spurs.

On the right and left of the steps leading to the sanctuary were two illuminated columns, surmounted by brilliant crosses. In the sanctuary behind the high altar rose a cross 50 feet in height, entirely covered with lights. The sanctuary was moreover illuminated by 48 sepulchral lamps in bronze, bearing more than 2000 lights.

At half-past eight o'clock the doors of the church were opened to the public who had tickets, and the persons whose rank entitled them to places.

Between that hour and eleven the Ministers, the Grand Officers of the Crown, the Foreign Ambassadors and Ministers, the Peers of France, the Deputies of the Departments, the Marshals of France, the various Magistrates and Judges, and deputations from numerous Public Bodies continued to arrive, and took the places which had been assigned to them.

At half past eleven o'clock the sound of drums and cannons announced the arrival of the Royal Princes and Princesses, attended by their great officers. The Clergy received their Royal Highnesses at the door, and conducted them to the places reserved for them. In stalls on the left of the catafalque sat the Dauphin and the Duke of Orleans (the Duke of Bourbon was prevented attending by indisposition) and on the right were the Dauphiness, the Duchess of Orleans, Mademoiselle of Orleans, and two sons and daughters of the Duke of Orleans.

The funeral service, which commenced immediately, was announced by a salute of artillery and another of musketry.

The Grand Almoner of France began the solemn Mass. After the Epistle, the Bishop of Hermopolis, Minister of Worship, ascended the pulpit and delivered an eloquent funeral oration, which produced a deep impression upon the auditory. After the oration, another salute of artillery and musketry was heard; and continued. At the offertory the King at Arms left his place, and after bowing to the altar, the Royal remains and the different high personages and bodies in the church, received from the canons of St. Denis a wax taper, with a handle of black velvet, in which were thirteen pieces of gold, and placed it upon the lowest step of the altar.

The Grand Master of the Ceremonies rose, saluted the altar, the Royal remains and the attendants, and approaching the Dauphin, informed him that the time was come to make his offering.

The Dauphin quitted his place, made the same salutations, kneeled upon a black velvet cushion before the officiating priest, kissed his ring and presented to him the taper with the pieces of gold which was handed to his Royal Highness by the Grand Master of the Ceremonies, who received it from the King at Arms. The Dauphin then bowed to the Altar and the Royal remains, and returned to his place.

The Duke of Orleans presented an offering with the same ceremony.

The mass proceeded. At the *Sanctus*, 12 of the King's pages with lighted tapers kneeled upon the steps of the sanctuary, and remained there till after the communion service.

When mass was ended, the officiating priest and the four prelates appointed by the King, approached the catafalque, and whilst they successively performed the absolution and the aspersion, the *De profundis* and the *Libera* were executed by the choristers of the King's Chapel, and some of the most distinguished musicians of the capital.

After the absolutions the coffin was removed from the catafalque by 12 of the Body Guards, and carried to the Royal vault. The pall was borne by the Chancellor of France, the President of the Chamber of Deputies, the President of the Court of Cassation, and the elder Marshal of France.

The officiating priest then descended and repeated in the vault the usual prayers, and, after throwing upon the coffin some earth and holy water, said—*R. quiescat in pace.*

The King at arms descended into the vault, and, throwing in his truncheon, cap and coat of mail, said *Hérauts d'armes de France, venez faire vos charges.*

The heralds at arms approached, threw into the vault their truncheons, coats of mail and caps, and returned to their places.

At the summons of the King at arms, the Major-General of the Royal Guards and the Captains of the Body Guards carried their respective standards, which were deposited in the vault. The royal spurs, gauntlets, shield, coat of mail, helm, *pennon*,\* sword

and banner, were likewise carried to the vault and deposited there, except the sword and banner of France, the point of the former and the extremity of the latter being merely presented.

The King at arms then summoned the Grand Master of France (the Duke d'Uzes as substitute for the Duke of Bourbon) to discharge the duties of his office. The Maîtres d'Hôtel, Chamberlains, and premier Maître d'Hôtel approached the vault, broke their staves, and threw them in.

The crown, sceptre, and hand of justice, were then carried by the officers appointed to bear them, and deposited in the vault.

The Duke d'Uzes placed in the vault the end of the staff of the Grand Master of France, and said in a loud voice—*Le Roi est mort!* The King at arms retired three steps and repeated aloud—*Le Roi est mort! le Roi est mort! le Roi est mort!* and turning towards the assembly, said—*Prions tous Dieu pour le repos de son âme.*

The Clergy and the whole congregation knelt and prayed.

The Duke d'Uzes, withdrawing his staff from the vault, exclaimed—*Vive le Roi!*

The King at arms repeated—*Vive le Roi! vive le Roi! vive le Roi Charles, dizième du nom, par la Grace de Dieu, Roi de France et de Navarre, très chrétien, très auguste, très puissant, notre très honnête seigneur et bon maître, à qui Dieu donne très longue et très heureuse vie! criez tous Vive le Roi!*

These words were scarcely audible on account of the eagerness of the spectators to shout *Vive le Roi!*

The sound of trumpets, drums, fifes, and other instruments of music were immediately heard, which, mingled with the shouts of the multitude, produced a surprising effect. The tomb was then closed upon the remains of the monarch who delivered France from the struggle in which she was engaged with the nations of Europe, and who was hailed upon his return from the land of exile as LOUIS-LE-DESIRÉ.

The Princes and Princesses were conducted to apartments in the building of the ancient Abbey, from whence, after resting for a short time, they returned to Paris.

The vast concourse of spectators evacuated the Church without the slightest disorder, and no accident occurred.

# EXPLICATION DU PLAN DE L'INTÉRIEUR DU CAVEAU DE ST-DENIS.

1. Entrée du caveau, qui se trouve à droite au bas des marches du chœur.
2. Place où est déposé le cercueil de Louis XVIII, soutenu sur des tréteaux de fer, ayant 12 pieds sur 9, et 6 pieds de haut.
3. Escalier de onze marches, de 9 à 10 pouces de hauteur, qui sert à descendre dans le corridor qui mène au caveau. La pierre de scellé repose sur la première marche. Cet escalier n'a guère que 6 pieds.
4. Corridor ayant 36 pieds de long sur 5 pieds de largeur; il mène à l'entrée du caveau de dépôt, où l'on entre en descendant deux marches, marquées 6.
5. Caveau de dépôt ayant 14 pieds de large sur 18 de long.
6. Grand caveau de la dimension de 33 pieds de long sur 16 de large. La totalité de la longueur du caveau, à partir des marches n° 6 jusqu'au fond marqué 9, est de 54 pieds, et de 16 dans sa plus grande largeur.
7. Est la partie du caveau la plus longue, où l'on avait établi, en 1806, une porte de bronze qu'on voit dans l'église souterraine. C'était par un trou pratiqué dans le mur, où l'on a ensuite placé la

365

porte, qu'on avait exhumé en 1793, les corps des Bourbons, qui étaient déposés dans ce caveau, la sépulture des Rois : on l'a nommée *la porte de profanation*, qui a été murée par l'ordre de Louis XVIII.

10. Deux caveaux de dépôt, ayant 12 à 15 pieds de longueur sur 6 de largeur à l'entrée, et allant en se rétrécissant. La voûte de l'intérieur est revêtue en stuc blanc, ayant au milieu les armes de France, peintes à fresque.

Ce caveau est pavé en carreaux de marbre blanc et noir.

11. Est une petite niche faite dans l'épaisseur du mur, où avaient été déposés le cœur de feu Monseigneur le Dauphin et Madame la Dauphine, père de Louis XVIII et de Charles X, qui ont été enterrés à Sens. On n'a voulu qu'indiquer la place.

Les murs latéraux sont revêtus de marbre noir, et ornés de chaque côté par quatre colonnes de pierre de liais.

**NOTA.** Le jour même de la première abdication de Bonaparte, un des battans de la porte d'airain qu'il avait fait placer à l'endroit où l'on voit le n°9, pour y pénétrer plus facilement par l'église souterraine, tomba avec fracas. Le fait est attesté par les Suisses, auxquels est confiée la garde de l'église royale de St.-Denis.

Il n'y a que 7 cercueils déposés dans le caveau de St-Denis : A est celui dans lequel on a recueilli les ossemens du Roi Louis XVI.

B est celui de la Reine.

C et D sont les deux cercueils de Madame Victoire et de Madame Adélaïde, qui sont placés du côté gauche. Immédiatement après est celui du duc de Berri.

E, F et G sont les dépouilles mortelles des deux enfans du duc de Berri.

### Public entry of the King into Paris.

Nothing could be more unfavorable than the weather  
this morning, notwithstanding which the procession  
took place according to the programme. \*

We had a good view from the Boulevards des  
Capucins N° 11 au ~~français~~ premier et Mr.  
Carpentier - It rained about one before the pro-  
cession reached our part of the Town, but the  
King must have been very wet, if he mounted  
on Horseback at the Bois de Boulogne as pro-  
posed - He passed us on horseback dressed  
as usual smiling & in good spirits - he was  
well received by the populace which ~~accourut~~  
was in the greatest numbers. --

They passed by the Boulevards to the Rue  
St Denis on to Notre Dame & I understand  
reached the Tuilleries about 4 o'clock. --

Home about One — night very fine & moonlight.  
— Above wet or heavier & continued gales  
of wind than we have had & heard of from  
every part of Europe & has not taken place  
in the memory of the oldest person living.  
The winds have been chiefly from the W.  
& the wrecks along the western coast  
of England are unprecedented. —  
At present we have not had a frosty day —
